VU4N Andaman Islands –update December 13

'The equipment coming over from VU7 will be available on December 16 at VU4 for pickup. Will get to work in the morning. The electrician will come in to setup the 3 phase supply in the morning. Will install the multiband 20-10 vertical first and get it going. Then the next will be the 30/40 vertical. December 17 is when I will get the 80/160m vertical up. Maybe sooner, depending upon, how the other 2 antennae go up. The hexbeam will be last. At least that's the plan. I will find a spot for the Rx loop once I get there.'

Join 3Y0K remote operator team

We're seeking operators who want to dedicate some of their time being a remote operator at 3Y0K. George AA7JV will design, test and supply us with 4 remote radios that will be accessible via Starlink to any operator worldwide. We're seeking remote operators:

- Who has DXpedition experience.
- FT8/CW operators.
- Team players.
- Dedicated.
- Preferably experience from remote operation.
- Want to dedicate their time to remote operation and want to be part of the Bouvet team.

You have to commit to operate like any other on island operator – but you don't have to travel for 50 days!

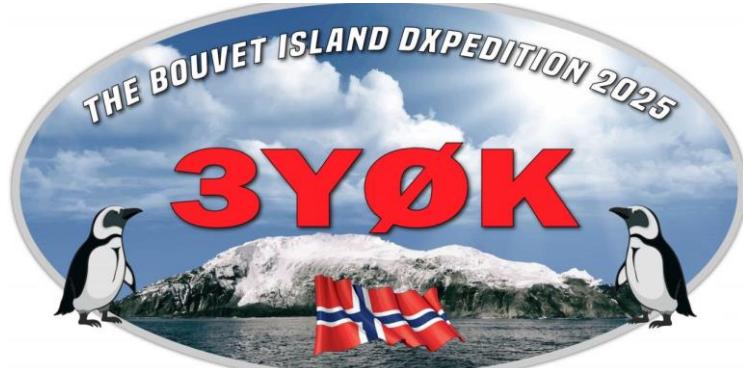

-We're looking for remote operators all over the world in different time zones.

-You want to experience how it is to operate from Bouvet, and have fun while running the Bouvet pileup!

-There will be a smaller operator fee for remote operators.

Please contact us for more information – send your experience and motivation to kenneth@opskar.no

T32TT Eastern Kiribati -update December 12

'Over 85K QSOs. Still massive traffic on all bands. We will start SSB soon. It looks like there will be a possibility for us to extend our stay in T32 land until Jan 12. We are just negotiating with land owners here. It's 44 deg C today. 100% humidity.

Please share with others who need T32. We are operating FT8 a different way then others. We are sending streams on the same band, 2 different frequencies at the same time, ie:

- 21.074 and 21.090
- 14.074 and 14.090
- 28.074 and 28.091

And so on..

In this case non-standard freq are almost empty and gives you a much faster way to be in the log.'

C21TS Nauru –update by Phil FK1TS/C21TS December 12

'Yes that was me on 60m this morning and this evening. Club Log updates were a little slow as I am not using my normal setup. Everything including LoTW is up to date now. So Club Log updates are manual for 60m and 80m for now but I should have that fixed tomorrow. 60m to EU was very good this morning my time with around 10 DXCC worked. This evening my time was OK but not as good. Look for me from around 1800 UTC if Mr Woodpecker stays away. I might be up a bit earlier tomorrow, will see.'

3Y0I Bouvet Island –update

Due to Dom 3D2USU being kicked out of the 3Y0K Bouvet DXpedition / Project which was made and led by Ken LA7GIA and Dom (Ken was informed by DX foundations that if he joined forces with the Rebel DX Group there would be no support for his DXpedition), the Rebel DX Group has decided the time is right to reactivate 3Y0I plans and stage their own DXpedition to Bouvet. You may remember that in 2019, the 3Y0I team were unsuccessful in getting to Bouvet due to inclement weather, seas and vessel damage.

For this DXpedition, there will be no support or funding needed. They seek no assistance from foundations or clubs. All equipment is in place already in South Africa. Plan is for three operators to land on Bouvet with an additional five more ops operating CW remotely – more on this in the future.

A vessel has already been secured and will be operated by four ex-Navy seals from Military Unit Formoza. A captain and first mate will complete the team – between them they have 25 years experience heading into the cold South Atlantic waters. Many years ago, Dom 3D2USU, landed several times on Bouvet using a dinghy during a 3-day stay. The whole crew is highly trained for this kind of landing and surviving in harsh conditions.
